

Preparation of Annual Action Plan for Curtorim Brand Development

As per Goa Panchayati Raj Act, 1994 under section 238(1) the Panchayat should prepare a annual development plan and submit to the Zilla Panchayat. Development cannot progress without responsibility, transparency and accountability. While preparing the plan the rules and processes to be followed for the maximum benefit of the village by taking these steps to control the drawbacks faced by the village Panchayat. Development should be carried out in a sensitive manner. There should be absolutely no damage to the Mangrooves and sanctity of lakes and springs should be maintained. While initiating developmental works in environment friendly area is recreation oriented, but with the interest of local inhabitants should kept in mind. The need of the hour is to strike a balance between environment and development planning by protecting /conserving of natural resources of this beautiful village by facing the following challenges to sustainable development

- a) **Social Challenge-** To be build on principles of Justice and equality
- b) **Political Challenges-** Environmental protection and up gradation depend on the political will of the village.
- c) **Economic Challenge-** Conserving resources of environment become an important component of Economics

Co-ordination for development

we should not allow the genuine effort for rapid socio-economic development of the people to be misconstrued or distorted by elements that are neither well versed nor well disposed towards the real problem of Curtorim village. The obstacles that existed in the way of rapid and sustained development should be pin pointed and once the development needs where agreed upon there should be funded and implemented at the earliest by the concerned authorities'

unplanned development is the cause of all the problems faced by us today. Without proper planning we are marching towards a slow death of our species. The culture of our ancestors who respected the nature and understood our well being is a result of well being of our surrounding and had come up with a concept of nature worship- **Jal, Jungle and Zameen** (Water, Forest and Land).

Activity

1. The first meeting of local developmental plans to discuss the guidelines and constituting Sectoral sub Committees of preparation of Village vision and prospective comprehensive plans
2. Formulation of local bodies' vision.
3. To make the Village Planning process who is responsible to monitor, evaluation, correction if any and to implement the programmes in the Villages.

Approaches

- 1) Spatial planning
- 2) People's participating like Gram sabha, working groups and Special Technical Advisory committee
- 3) Top down- Grassroot up approach.
- 4) State of Art Technology
- 5) Integration of various development agencies (like Govt Department, Autonomous bodies, NGO's / CBO's and private developers)

IMPORTANT

- 1) Settlement Studies- Study of Population. Projections, landuse, settlement character, urbanization trends and connectivity.
- 2) Study of resources-Agriculture , Fisheries , Industries, Animal husbandry , Tourism, Environmental studies and minor minerals etc
- 3) Challenges- Social Political & Economics
- 4) Disaster Management /Garbage Management Plans.
- 5) Tribal's areas to be identified , protection to existing eco-sensitive areas/sites in the village to be identified
- 6) Annual Report of Audit for the year 2014-15 & 2015-16 you can view it on Panchayat Website : www.curtorimpanchayat.com
